Projects I've Worked

https://github.com/abid365/linguamastery-fullstack-project

My role in this project:

- **Designed**: I've designed the whole project. All the assets are designed in Canva. The front end design is developed with React along with tailwind css.
- **Developed-backend**: Developed using nodejs, MongoDB as a database, and jwt for authentication and security. Also used Axios interceptor and Tanstackquery.
- **Deployed**: Deployed Front-End in Firebase and backend in vercel.

Tools I Use:

Netlify   npm   GitSCM   VS Code

Skills:

✨I have spent almost 2+ years developing myself. I have organized routines, and daily plans to enhance my productivity at work and adapted to new technologies and methods in this field. I am a full-stack developer with a good sense of design and color theory.

My Tech Stack:

Front-End

1.HTML , CSS
Framework: Tailwind , Bootstrap

2.Java-Script

Front-End Frameworks

React
#Additional Tools:
   a. React-router
   b. Axios
   c. React-Query

Backend Technologies:

1. MongoDB   2. Express.js

3. Node.js   4. Firebase

Linguistic Abilities:

English: Proficient in both reading and writing

Can talk in basic Turkce too
